OBJECTIVES OF THE ASSIGNMENT

The overall objective of the project is to develop a new Sava GIS 2.0 system - an advanced system that will modernize the existing Sava GIS and support sustainable, efficient, and secure water management across the Sava River Basin, enhancing regional cooperation under the ISRBC framework. The major expected outcomes of the project are:

1. Improvement of existing core functionalities
    - User management
    - Data management
    - Geoportal viewer
    - Validator
2. Existing modules improvement (RBM, FRM, NAV, APC)
    - Data model update and enhancement
    - Notification functionalities
    - Dashboards
    - Reporting functionalities
3. Development of new thematic functionalities:
    - Marking Plan for the Sava River and its navigable tributaries
    - Sava River Waterway infrastructure
    - Sediment management module
4. Enhancement of system security and user capacity
    - Cybersecurity enhancement through implementation of modern security controls and authorization mechanisms
    - User training and capacity building

The system will be installed at the ISRBC premises, and the timeframe for system supply, implementation, testing, training, and installation is 13 months from the contract signing date.
