Executive Summary

Template (1)

(a) Overall status and trends in implementation of the FASRB on national level
Please provide your perspective and view below.
FASRB je bil v Republiki Sloveniji ratificiran na državni ravni. Sporazum se izvaja v skladu z evropskim pravnim redom (vodna direktiva, poplavna direktiva, prilagajanje podnebnim spremembam) in dobrimi praksami na vseh relevantnih področjih sodobnega čezmejnega celostnega upravljanja voda.
(b) Key actions taken in support of the FASRB's objectives in its two basic fields – water management and navigation
Please provide your perspective and view below.
Priprava načrtov upravljanja voda. Priprava načrtov zmanjševanja poplavne ogroženosti. Priprava strategije za prilagajanje na podnebne spremembe. Izvajanje ciljev podnebno-energetskega paketa. Priprava Državnega načrta zaščite in reševanja ob poplavah Aktivno sodelovanje pri študiji izvedljivosti za ponovno vzpostavitev plovnosti na reki Savi. Izvajanje čezmejnih projektov bialateralnega, subregionalnega in regionalnega projektnega okolja, sofinanciranih s sredstvi EU. Nadaljevanje proaktivnega izvajanja vsebin in aktivnosti za delovanje Sava Flood Forecasting System (SFFS) na ARSO z zagotovitvijo človeških virov, prostora ter strojne in programske opreme v ta namen. Te aktivnosti so v letu 2018 omogočile začetek delovanja SFFS v celotnem porečju Save, kar je zaznavno izboljšalo kakovost napovedi visokih voda v vseh državah v mednarodnem porečju. Proaktivno izvajanje sklepov 7. Parlamenta mladih Savskega bazena (Bohinj, 1. junij 2018) za okrepitev vloge mladih generacij pri načrtovanju prihodnosti v porečju Save (SRBMP). V ta namen je MOP pripravil tematsko delavnico za učitelje ob razstavi Živeti z vodo (Muzej za arhitekturo in oblikovanje, Ljubljana, november 2018), na kateri je s prispevkom nastopila tudi takrat aktualna predsednica Parlamenta mladih Savskega bazena, dejavno pa je sodeloval tudi izvršni sekretar MKSB Dragan Zeljko. MOP je v sodelovanju z MZZ in Gospodarsko zbornico ob Svetovnem dnevu voda 2019 soorganiziral posvet o pomenu vode za razvoj. Na ta posvet je bila kot panelistka povabljen tudi takrat aktualna predsednica Parlamenta mladih Savskega bazena. Priporočila so bila uporabljena pri zasnovi Mednarodne konference Zaživeti z vodo (Podsreda, 31. maj–1. junij 2019), ki je sprejela Resolucijo Živeti z vodo o pomenu vključevanja šol in mladih generacij v celovito upravljanje vodnih virov, vključno z načrtovanjem prilagoditvenih ukrepov na podnebne spremembe. Resolucijo so sprejeli tudi udeleženci 8. zasedanja Parlamenta mladih Savskega bazena. V sodelovanju z ARSO, MKSB, Zvezo geografov Slovenije in Zvezo geografov Hrvaške je MOP z udeleženci obeh dogodkov organiziral tudi postavljanje oznak najvišjih gladin vode na mejni reki Sotli. Dogodka se je aktivno udeležil tudi predsednik ICPDR Peter Kovacs. Društvo učiteljev geografije Slovenije je izdalo tudi zbornik mednarodne konference Zaživeti z vodo (317 strani).
(c) Areas where national implementation has been most effective and/or most lacking
Please provide your perspective and view below.
Učinkovito: Upravljanje voda, zmanjševanja poplavne ogroženosti, plovnost in turistična raba. Pomanjkljivo: Prilagajanje podnebnim spremembam, kmetijstvo (namakanje, škropljenje, čezmejni vplivi).
(d) Major obstacles encountered in implementation

Please provide your perspective and view below.
FASRB je sporazum izrazito medsektorske narave, kar zahteva intenzivne medresorske koordinacije s številnimi deležniki.
(e) Future priorities and Policy Recommendations
Please provide your perspective and view below.
<p>Medsektorske čezmejne rešitve in ureditve, večnamenske rabe rečnih koridorjev, plovnost, hidroenergetska raba in sprejem prilagoditvenih ukrepov v skladu s podnebno-energetskim paketom, ob upoštevanju okoljskih ciljev.</p> <p>Razvoj znanj, metod in rešitev presoj neksus na področjih voda-hrana-energija-ekosistem (nexus water-food-energy-ecosystem assessment) v območju mednarodnega porečja reke Save.</p> <p>Nadaljevanje krepitve vključevanja mladih generacij pri pripravi načrtov upravljanja porečij na vseh ravneh (lokalni, državni, čezmejni) v skladu z predlogi resolucije Živeti z vodo (Podsreda / Kumrovec, Dan Save, 1. junij 2019).</p>
(f) Any other issues of importance not included in a) – e)
Please provide your perspective and view below.
Vsebina podnebnih sprememb in prilagoditvenih ukrepov še ni zadostno umeščena v izvajanje FASRB. Velika priložnost za to je vzpostavljen Sava FFS, ki omogoča čezmejno sodelovanje in trajnostno upravljanje tudi v obdobjih nizkih pretokov.

Državni načrt zaščite in reševanja ob poplavah

Obvladovanje poplavnih tveganj obsega preprečevanje poplav, varstvo pred poplavami, zavedanje o poplavni nevarnosti, pripravljenost na poplave, ukrepanje ob poplavah in obnovo. Z načrtom se ureja ukrepanje ob poplavah oziroma odziv ob poplavah. Načrt predvideva tudi obveščanje drugih držav, Evropske unije in mednarodnih organizacij.

Projekt BOBER

Nadgradnja hidrološkega prognostičnega sistema na celotno ozemlje Slovenije, nadgradnja hidroloških in meteoroloških merilnih mest in postavitve drugega meteorološkega radarja, operativno vključevanje oceanografskih modelov z atmosferskimi in hidrološkimi. Našteto je potekalo oziroma se je izvajalo v sklopu projekta BOBER.

III) Please provide information on current status and trends in relation to the target above.

Stalna delovna skupina pri Mednarodni komisiji za varstvo reke Donave je na 17. rednem srečanju na pobudo slovenske delegacije sklenila, da se bodo dobre prakse, metode in izsledki EU projekta DRIDANUBE upoštevali pri izvedbi aktualnega in pri izdelavah prihodnjih Donavskih NUV. Priporočamo, da se znanja projekta DRIDANUBE s področja upravljanja suš prenesejo tudi na raven Savskega bazena in delovanja Mednarodne komisije za Savski bazen.

IV) Please use the scale indicated below by marking an "X" to reflect the level of difficulties and obstacles faced by your country in implementing of the target above.

Posebno pozornost je potrebno nameniti čezmejnemu usklajevanju ukrepov za zmanjševanje poplavne ogroženosti. Hkrati je potrebno obravnavati tudi načrtovanje ukrepov za zmanjševanje škod ob sušah. Poudarjamo, da je potrebno obe vsebini uveljavljati usklajeno na vseh ravneh vodnega načrtovanja, na državni, meddržavni in subregionalni ravni.

Napredek je zaznan na ravni Mednarodne komisije za Savski bazen (ISRBC) za pripravo drugega Savskega NUV z:

- vključevanjem prostorskega razvoja v izvajanje ciljev Savskega NUV,
- načrtovanjem večnamenskih ureditev za trajnostno rabo vodnih virov v mednarodnem porečju Save,
- načrtovanjem intermodalnih ureditev za izboljšanje kakovosti bivanja in zagotavljanje trajnostne mobilnosti,
- upoštevanjem zelene infrastrukture in ekosistemskih storitev pri načrtovanju trajnostnega razvoja v SRB z uveljavljanjem ekološko zveznih zelenih in modrih koridorjev in
- vzpodbujanjem na ekosistemi temelječih prilagoditvenih ukrepov na podnebne spremembe.

<p>Ker komercialna plovba po Savi in njenih pritokih v Republiki Sloveniji še ni polno razvita, državni razvojni načrti predvidevajo izvedbo večnamenskih ureditev na mejnem in čezmejnem odseku. Z izvedbo teh bo ta dejavnost mogoča tudi v Republiki Sloveniji, hkrati pa bo realiziran tudi Okvirni sporazum o Savskem bazenu, ki v vseh savskih državah predvideva prosto plovbo po reki Savi.</p>

Chapter IV. Any other issues of importance for the implementation of the FASRB and its protocols

Please provide any relevant information.

Za izvajanje FASRB je med drugim pomembna tudi usklajitev subregionalnih aktivnosti za doseganje ciljev podnebno energetskega paketa, s posebnim poudarkom na ureditvah na območjih čezmejnih vplivov.

Za učinkovito izvajanje Podonavske strategije je ključna subregionalna raven, na kateri ima ključno vlogo Okvirni sporazum o Savskem bazenu kot edini subregionalni sporazum v Podonavju. Prednostni projekti v Savskem bazenu so čezmejne ureditve za vzpostavitev trajnostne plovbe ter zmanjšanje poplavne ogroženosti, vključno s povečanjem deleža rabe obnovljivih virov. Osrednji dokument je načrt upravljanja mednarodnega porečja Save, ki ga Evropska komisija tudi finančno podpira. Hkrati Svetovna banka financira pripravo študije vpliva podnebnih sprememb na vodni režim Save, saj predstavlja vsebina ključni izziv državam v mednarodnem porečju reke Save. Podonavska strategija odpira velike razvojne možnosti vsem državam pogodbenicam Savskega sporazuma za okrepitev čezmejnega sodelovanja pri načrtovanju in izvedbi celovitih čezmejnih projektov. Posamezna država ureditev za večjo poplavno varnost, hidroenergetsko rabo in plovbo ne more izvesti sama, unilateralno - ker gre za ureditve v čezmejnem kontekstu, jih lahko države načrtujejo le meddržavno, subregionalno ali regionalno. To je izjemen razvojni izziv za države Savskega bazena, saj prispeva k vzpostavitvi nizkoogljične družbe s celovitimi ureditvami za trajnostno hidroenergetsko rabo, namakanjem ter intermodalnimi povezavami prometnih tokov med železnico, cesto in reko, vključno z ureditvijo turističnega potenciala v celotnem Savskem bazenu.

Mednarodna komisija za Savski bazen je s sprejetjem Skupnega akcijskega načrta za Savski bazen (Joint Action Plan for the Sava River Basin, 2017) omogočila razvoj študije Svetovne banke Sava Drina River Corridor Integrated Development Plan (2018). Dokumenta tvorita izhodišče za realizacijo Donavske strategije v območju Savskega bazena ter posledični trajnostni razvoj regije ter prispevek k miru in stabilnosti.

Prav tako poudarjamo pomen celoviti obravnavi razvoja v kontekstu voda-prehrana-energija-ekosistemi na občutljivih čezmejnih kraških vodonosnikih Dinaridov. Pri načrtovanju razvoja na kraških območjih je treba za ohranitev zdravih vodnih virov upoštevati podzemno kraško hidrologijo, vključno s podzemnimi habitati.

Navedeni pristop celostnega upravljanja vodnih virov (Integrated Water Resources Management) v mednarodnem porečju uporabljamo kot primer aplikacije načel UNECE konvencije in za izvajanje EU makroregionalnih strategij. Naš cilj je demonstriranje sinergij in širjenje dobrih praks iz porečja Save v jadransko povodje v okviru evropskega procesa povezovanja makroregionalnih strategij (EUSDR in EUSAIR). Pri tem iščemo nove poti za okrepitev socialne in ekonomske dimenzije v pripravi drugega Savskega NUV kot vključevanja mladih generacij (Parlament mladih SRB), vključevanja deležnikov (Sava Stakeholder Conference) in povezovanja regije (Traditional Sava Bike Tour).

Chapter V. Conclusions: Progress towards the Implementation of the FASRB and its protocols

Template (20)

Key information or findings of implementation of FASRB at national level
I) Has implementation of the FASRB and its protocols had any impact on improving water management issues and navigation in your country?
Please provide details below.
Ocenjujemo, da je implementacija FASRB pospešila in izboljšala sodelovanje med resorji za obravnavo predmetnih vsebin.
II) Which of the objectives and goals of the FASRB and its protocols are being achieved?
Please provide your perspective and view below.
Ustanovitev Mednarodne komisije za Savski bazen in stalnega sekretariata za koordiniranje pogodbenic Okvirnega sporazuma o Savskem bazenu. Čezmejno sodelovanje za trajnostno rabo vodnih virov porečja Save.
III) Please provide an analysis of lessons learned regarding implementation, highlighting examples of actions taken.
Okvirni sporazum o Savskem bazenu je izrazito čezsektorski, zato zahteva veliko mero usklajevanja in koordinacije. Izpostaviti je treba aktivnosti za umestitev kompleksnih infrastrukturnih objektov v prostor, kar lahko dosežemo z ustreznimi mehanizmi in ukrepi prostorskega načrtovanja, ki upoštevajo raznolikost vidikov posameznih človeških aktivnosti (hidroenergetska raba, plovba, kmetijstvo, turizem, voda, varstvo narave itd.). To zahteva dejavno sodelovanje relevantnih deležnikov pri načrtovanju in izvedbi načrtov upravljanja voda in načrtov zmanjševanja poplavne ogroženosti, upoštevajoč cilje podnebno-energetskega paketa v Republiki Sloveniji. Z mednarodnega vidika je treba izpostaviti, da je Okvirni sporazum o Savskem bazenu prvi tovrstni sporazum na subregionalni ravni, s katerim se vzpostavlja praksa, ki je na tem področju doslej ni bilo. Narejena je študija izvedljivosti za ponovno vzpostavitev plovnosti v Savskem bazenu.
IV) Please provide information on difficulties and obstacles in implementation of the FASRB and its protocols.
Izrazit medsektorski pristop, ki do sedaj ni bil praksa, povzroča začetne težave v komunikaciji z različnimi deležniki na nacionalni ravni.
V) Please provide information on future priorities and capacity-building need for further succesful implementation of the FASRB and its protocols.
Za doseganje ciljev podnebno-energetskega paketa na subregionalni ravni je potrebno poiskati nove in učinkovite oblike povezovanja za izvedbo ukrepov na lokalni, regionalni, državni, meddržavni in subregionalni ravni.
VI) Please provide any suggestions of actions that need to be taken at the regional level to further enhance implementation of the FASRB and its protocols.
Za doseg ciljev FASRB Republika Slovenija pričakuje, da bo sekretariat proaktivna asistenca pogodbenicam. Zato predlagamo, da države Savskega bazena okrepijo sodelovanje v okviru Mednarodne komisije za Savski bazen, v okviru novega »Partnerstva za reko Savo«, ki povezuje lokalne skupnosti, deležnike z lokalne, regionalne in nacionalne ravni z različnih področij, savske države in nevladne organizacije za načrtovanje trajnostne rabe vodnih virov za večjo kakovost življenja v Savskem bazenu. Pogodbenice Okvirnega sporazuma o Savskem bazenu in Mednarodne komisije za Savski bazen naj

te dosežke aktivno uporabijo v okviru izvajanja procesov evropskih makroregionalnih strategij (EUSDR, EUSAIR, EUSALP) in izvajanju regionalnih konvencij.
